ABOUT

Software Engineer with 10+ years of commercial experience in frontend engineering and 3+ years of hands-on full-stack experience in AI systems. Proven track record of leading large-scale distributed systems design, mentoring engineering teams, and driving cross-functional initiatives. Deep expertise in TypeScript, React, Next.js, Node.js, and modern build tools (Webpack, Vite). Strong background in cloud-native architectures (AWS, Kubernetes, Docker) and infrastructure-as-code. Active open-source contributor with published peer-reviewed research. Passionate about code quality, security-first development, and building high-performing engineering cultures.

PROFESSIONAL EXPERIENCE

Senior Software Engineer — AI First Team

May 2025 — Present

PagerDuty

- Lead and design distributed architecture for Agent-to-Agent (A2A) and Web-AI chat experiences using SSE, Webhooks, and Kafka async messaging
- Drive consensus across AI domain teams to align all AI systems on common distributed architecture
- Design LLM evaluation pipelines (LLM-as-Judge) for classification tasks
- Tech: LangGraph, FastAPI, FastMCP, Google A2A, Python, TypeScript, Kafka, AWS

Senior Product Engineer — Frontend

May 2023 — May 2025

Rely.io

- Led frontend team of 4 engineers, establishing design system consistency and code quality standards
- Led RBAC design and implementation, collaborating closely with third-party vendors for software integrations
- Regularly engaged with customers to understand pain points and inform product direction
- Owned all frontend apps (frontend, BFF); collaborated on building backend apps with backend product engineers

Senior Software Engineer — PeacockTV, SkyShowtime, Showmax

Sep 2021 — May 2023

Sky

- Led multi-device onboarding for video platform across set-top boxes, Xbox, PlayStation, smart TVs, and web
- Deep expertise in headless TypeScript video technology — in-house video player library and Google Shaka Player
- Drove device integration initiatives, collaborating with cross-department engineering teams
- Owned technical workshops to onboard client teams on video player technology and best practices

EDUCATION

MSc Computer Science & Engineering

Instituto Superior Técnico (IST)
Lisbon, Portugal

Focus: Blockchain, Distributed Systems, Network Security,
Privacy in HRI

Publications

- 🔗 BlockRobot: Increasing Privacy in Human Robot Interaction
- 🔗 Blockchain-based Architecture for Privacy in Human Robot Interaction
- 📄 Thesis 📄 Abstract

OPEN SOURCE

BarkGPT 🔗 📄

Educational GPT-style language model built from scratch to explore transformer internals, training loops, and inference mechanics.

IaC Toolbox 🔗 📄

Open-source tutorials for deploying modern applications securely on AWS using Terraform and infrastructure-as-code best practices.

SKILLS

Languages: TypeScript, Python, JavaScript, Elixir
Frontend: React, Next.js, shadcn/ui, Webpack, Vite, Node.js
AI/ML: LangGraph, LLM Evaluation, AI Agents, MCP, A2A, Kafka
Infrastructure: AWS, Kubernetes, Docker, Terraform, CI/CD
Leadership: Team mentorship, Technical design, Cross-functional collaboration
